

# Supporting Geochemical Results: Dissolved Oxygen

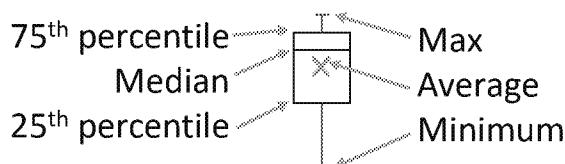

NEW

- Dissolved oxygen (DO) concentrations at RHMW04, RHMW05, RHMW06, RHMW09, RHMW10, and Red Hill Shaft fall within the range of DO measured at other Oahu wells
  - The number of samples plotted is given at the top of the figure

- DO is a field measurement and is subject to user/instrument variability and error.
  - Users must allow enough time to reach equilibrium
  - Ensure properly calibrated
  - Precision can vary between different instruments
